- ★ Practice section allows the student to choose the problems they want to work on and they can print a report with those problems they miss
- ★ Target Grades 4 - and up
- ★ Appropriate for all ages 7 & up

Super Star Online

The Games of Math

Practicing division and fractions has never been so much fun. Students begin at the appropriate level: beginning, intermediate or advanced. There are two practice sections to review specific division and fraction problems. Then the student builds skills in simple division, long division with remainders, division word problems, simplifying fractions and solving mixed fractions while playing challenging games such as; car racing, hurdles, newspaper delivery, motocross, and karate. Each of these games features 11 levels of play.

The Practice

In our practice area, students can pick the problems they want to work on, then they can select a timed test or a untimed practice. At the end of the practice test, the problems they missed can be printed and they can retake the test with those problems.

Pre-Test and Post-Test

A Pre-test and Post-test helps track the progress of each student and class. Easy-to-read student and class reports can be printed from the student management section.

Online: PC, MAC & Chromebook

Games of Math 4 is included in any subscription to Super Star Online. Compatible with Windows, MAC and Chromebook computers. Requires Flash browser and fast internet connection.

Motivation and Tracking System

The Help Me 2 Learn - Super Star Progress, Motivational and Tracking System

Our Super Star Progress Graph, Motivational and Tracking System is designed to keep students engaged and motivated. Students choose the appropriate level to begin. Their goal is to complete each level in each game (lesson) to move up the levels to complete level 12 of each game. They are rewarded with a gold star and a certificate of completion for that game. If they earn a gold star in all 6 games, they are rewarded with an overall gold star and certification of completion for the program.

Designed for Students Age 7 and above

Featuring young adult characters and sports games to engage students in math games that will appeal to elementary, middle school, high school and adult students. It is especially appealing to students who require lots of action and activity to keep their attention.

Appropriate for at-risk students, ESL students and special needs students do to special features that allow students to play a game or complete a series of questions.
