

## 2018 Super Star Year in Review

June is just a few days away. Many schools have already recessed for the summer and most will break in a few days. Below is a review of the projects we are working on and what we have accomplished this year since January 1, 2018. The source for this review is our monthly newsletters, which are available

at: <http://helpme2learn.com/company/news>

### January 2018

We announced our new **Super Star (free) apps** for iOS and Android. The purpose of these apps is to make it easier for young students to access our courses using an iPad or Android device

<http://helpme2learn.com/school/apps>.

We also announced that our **Silly Pictures** course is now available in HTML5, which means that it can be used on iOS and Android devices.

### February 2018

We announced the release/update of our new **Super Star Movies**. There are 151 movies and total playing time of almost 8 hours. Teachers can use the movies as a whole class activity and then discuss the movie with the students. Teachers can use the movies to prepare the students before the students use our courses on their computers. Super Star Movies is a HTML5 course. This means that it can be used on almost any device that is connected to the Internet, including computers, Android phones or tablets, and iPads or iPhones

### March 2018

We announced that our **Silly Sentences** course is now available in HTML5, which means that it can be used on iOS and Android devices.

We congratulated the current leaders of our **World Record Speed Round Challenge** (found in Phonics 1b). We will update this final list at the end of June.

### April 2018

We announced that we added a new **star print button** to the class progress report of each of our courses. This means that a teacher can login to their teacher account and from the Class Progress Report they can easily print Super Star Certificates of Achievement.

We announced that we are working on providing **Single Sign-in** and **Secure Sync** using [www.Clever.com](http://www.Clever.com). We are still working on this and will update you with our progress. We believe that this is the future for online education. With Single Sign-in, kids only need to sign-in once and they will have access to all of their applications without remembering the user name and password for each. Secure Sync allows data synchronization with the school and eliminates the need for an import.

---

## **December 2017**

In December of 2017 we reviewed the new courses and progress that we made in 2017.

We are working on making all of our courses HTML5 compatible.

### **Our Mission:**

It is always our mission to bring our customers the most engaging and most effective educational courses available. We believe that kids will learn more and learn faster when they love learning with Super Star. We always appreciate your support and welcome any comments you might have. We hope that you have a great summer break (for those who get a summer break), you deserve it! And thank you for helping kids 2 learn.

To all of the parents who will have their kids home for the summer, we hope that you enjoy your time with your kids. We also hope that you will take some time to keep the learning going and that you will read to or with your kids.

Below a list of our courses by recommended grade:
