

Phonics 1a - Vowel Sounds - HTML5

I can now announce that our HTML5 version of Phonics 1a is now live.

This means that you can now use Beginning Reading - Kcc and Phonics 1a - Vowel Sounds on an iPad, iPhone or Android device.

The way this works is; if you are using a computer or device that supports Flash, you will use the Flash version. If you are on a device that does not support Flash, you will use the HTML5 version. Our goal is to deliver our courses to you seamlessly, so that our products will work on almost any device. We are not there yet, but we are working on it.

You can tell which courses are HTML5 by looking for the tablet icon on the product icon.

We are now working on Phonics 1b and hope to have it available in HTML5 sometime early next year.

Coming in 2017

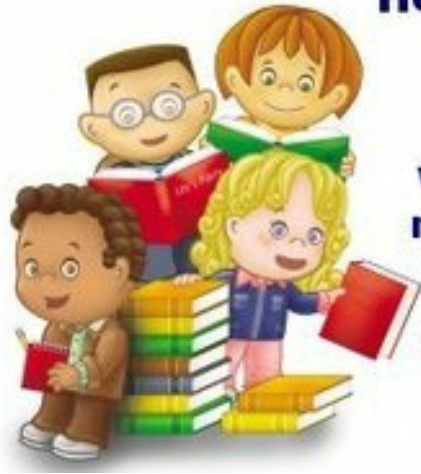

- more courses converted to HTML5
- launch of Super Star Phonics, Inc. - non-profit to help promote phonics and literacy
- new teacher tools and resources

"Super Star Online with Speed Learning System!"

Best Wishes and Many Thanks

As the year comes to an end, I wish to extend my many thanks to our loyal customers and our new customers. We had about a 95% renewal of Super Star Online this year and had a few past customers return. It was a very good year.

My best wishes to all of you for a happy and prosperous new year. My special thanks to Merrick Charlton, a loyal newsletter reader. My special thanks to all the wonderful parents and teachers who care about the education of kids.
