Mr. Sheffield,

I want to let educators as well as parents know how Help Me 2 Learn Software can benefit all children. This program enable children to memorize different rules and sounds through songs. The tunes set to words really stay with children along with the animation. All of these things hold their attention. I have studied lots of software and there are none so far that can compare to yours. Students are able to hear each consonant sound along with the short and long vowel sounds. It doesn't stop there it goes on with consonant blends, digraphs, diphthongs etc. The math is also wonderful. I had a chance to view the new software programs, and once again they are just Wonderful!!!

Sincerely  
Joyce Foster  
Computer Tech.
