Dear Mr. Sheffield,

I would recommend your computer program *Help Me 2 Learn Phonics* to any teacher. This program has been engaging for the students and valuable as a support for teaching the California State Standards. The activities were organized in such a way as to allow the students to pace their own learning with easy directions so students could work independently while in the computer lab. I know the "gold star" achievement award became a big motivating factor for my students. They were reviewing important second grade phonemic elements and loving it. Thanks again.

Sincerely,

Mrs. Nilsen
