

Games of Math 1 - Addition & Money Now in HTML5

I am very happy to announce that we have made Games of Math 1 - Addition & Money: Beta, available in HTML5. I say Beta because the course still needs one game to be completed. I planned to wait until July to release the HTML5 version, but I know that some parents only have a tablet or phone, so I thought it was better to release a Beta version, rather than wait. Hopefully, we will finish the last game soon.

I am very excited about the new HTML5 version; I would love to hear your comments. If you find any bugs or problems, please let me know. There are a few changes, the biggest being that it is completely open without the locks we have in the Flash version. Kids can move to any game and any stage, it is wide open, for now.

There have been some changes in the Build a Pet game; kids now have more options to build their character and few options for the pet. We also removed one of the activities in the Pet Competition. The Gold Tower (word problems) is the missing game, we are working on it. We will also add the Pretest and Post-tests.

Those with a browser that supports Flash will still be able to use the completed Flash version. Those on tablets, phones, or computers that don't support Flash, will be able to use the HTML5 version.

I added a new video to <http://helpme2learn.com/support/online> to explain setting up the Chrome browser to support Flash. You can also access this page from the Help button at the bottom the Super Star Online sign-in screen.

Help for our Customers

These are challenging times for everyone, but the Coronavirus has made the job of educating kids so much more difficult. We don't know how long this will go on. The hope of opening schools this school year seems dim.

We are proud that we can help schools and parents provide online education for their kids. We want to help. For all of our current customers, we are rolling back our pricing to last year's pricing (\$4 per user, per year) for subscriptions for the 2020 - 2021 school year.

We are also looking at funding that might be available from the recent Coronavirus Aid, Relief, and Economic Security Act (CARES), more on that later.

For those who have accepted our 60-day free trial, we are extending the free trial to June 30, 2020.

We now offer a free subscription to Super Star Online for **schools**, good until June 30, 2020, from our web site
at: <https://helpme2learn.com/school/online> .

For **parents**, we offer a 30-day free trial of Super Star Online from our home and homeschool web site
at: <https://superstarphonics.com> .

If there is anything we can do to help, please let us know.

Please accept my best wishes for you, your family and your kids during this difficult time.

- Dan

Need a Quote?

If you need a written quote, I would be happy to provide one for you. Send me a request for a quote to: dan@helpme2learn.com . Let me know if I can help in any way. We appreciate your business.
