Three Exceptional Math Courses! for Pre-K to 1st Grade

Math

Numbers - Number Recognition

Numbers - Counting

Numbers - Math

We have many outstanding courses, but I am especially proud of our new mini courses. I am very excited to announce that we have just completed our new series of math mini courses for grades PreK to 1st grade.

These courses are an expanded version of the math from our Letters & Numbers, which has been a customer favorite for years.

For those who already enjoy a subscription to Super Star Online, you should already have access to these math courses. You may need to add them to your classes. If you don't have access, please contact me and I will add them.

For those who do not have a current subscription, before I explain the many new features and content of these courses, I want to give you a chance to explore them for yourself. Here is an open access to all three courses that is good until **November 12th**:

<https://superstar.HM2L.com/math3> . User name (2 or any number from 2 to 20), password: star.

The titles of the three new math courses are:

Super Star Numbers - **Number Recognition** - teaches the numbers 1 to 30, the order of the numbers: PreK - K

Super Star Numbers - **Counting** - teaches counting to 10, to 20, and

to 30: K

Super Star Numbers – **Math** – teachers beginning addition, subtraction, and sequencing: K – 1

Since these are an expanded version of the math from our Letters & Numbers, here are the numbers: in Letters & Numbers there are a total of 14 stars, in the combined math series there are a total of 34 stars.

New Features:

- More skill specific - by breaking the math into three separate courses, it will now be easier for teachers to target the skills that students need to work on. Each course has a pre-test and post-test, so teachers who are unsure about where a student star can use these tests to help.
- Progress is now proximately displayed at the top under the name of the student showing the goal of achieving at Super Star Gold Certificate of Achievement.
- Speed Rounds are now included as part of our Super Star system. These one minute exercises are a great way to build math skills, but were not required in Letters & Numbers. Teachers can adjust the number of correct answers required from the student management system.
- Many more games. We have added several new games to make learning math more engaging and more fun. Many of the new games help build beginning addition and subtraction skills.
- Our open access to all three courses that is good until **November 12th**: <https://superstar.HM2L.com/math3> . User name (2 or any number from 2 to 20), password: star.
